

M120 SERIES

80 AFUE High-Efficiency Single-Stage, Fixed-Speed Gas Furnace

MAYTAG® RELIABILITY

Below are key features and benefits of the Maytag M120 Series 80 AFUE* high-efficiency upflow/horizontal gas furnace.

- Each unit offers Maytag's 12-year Worry-Free Limited Warranty on parts and a limited lifetime heat exchanger warranty.
- Our Dependability Promise states that your entire unit will be replaced in the first year should the heat exchanger fail. See your warranty for details.
- A fixed blower delay setting delivers more comfortable air into your home upon furnace start-up.
- The unique burner design and the insulated blower compartment assure clean and quiet operation.
- The furnace can be installed vertically or horizontally.
- At less than 35 inches tall, the unit's short profile makes it ideal for tight spaces, such as utility rooms or closets.

* AFUE: Annual Fuel Utilization Efficiency

Trust Maytag®

Your home is the center of your universe. It's where you take care of your family, find solace from the outside world, cultivate your hobbies and bring friends together. While not always on your mind, your furnace plays an important role in keeping your home comfortable. Maytag understands how valuable your home is to you, and therefore offers you high quality home comfort system units, including our high-efficiency gas furnace.

DEPEND ON MAYTAG®

Just as you expect from Maytag, your M120 Series high-efficiency gas furnace offers one of the best warranties available in the industry. The 12-year Worry-Free Limited Warranty on parts reflects Maytag's commitment to you. Ask your select Maytag heating and cooling dealer for details, or visit us at www.maytag HVAC.com.

REPLACING YOUR OLD FURNACE CAN SAVE YOU MONEY

Your 80 AFUE Maytag gas furnace has been evaluated with the Annual Fuel Utilization Efficiency scale, or AFUE. The higher the number, the more efficiently your furnace operates. A high-efficiency system uses less energy than older, less efficient units and can save you money on utility bills.

You can maximize energy savings by upgrading your furnace with a variable speed blower, which improves indoor air quality and can further increase the efficiency of your outdoor unit.

CREATE TOTAL INDOOR COMFORT

Indoor Coil

Thermostat

Air Cleaner

Humidifier

Your gas furnace is only one part of the comfort system that affects your air quality and energy savings. The following system components from Maytag can improve indoor air quality and help ensure the optimum performance of your comfort system.

Indoor Coil: When you install a new split system air conditioner, Maytag recommends you replace the existing indoor coil with a matched Maytag coil to guarantee maximum efficiency and performance of your outdoor unit. (Please note the Dependability Promise is valid only when you install both the outdoor air conditioner and indoor coil.)

Programmable Thermostat: The thermostat automatically adjusts your indoor temperature to accommodate both your home and away schedules, thereby reducing energy costs.

Electronic Air Cleaner: Improve indoor air filtration with an electronic air cleaner that can remove 95% of household allergens, such as dust mites, pollen and smoke.

UV Germicidal Lamps: Installing an ultraviolet accessory on your furnace or air handler helps eliminate odor-causing mold and fungus that can develop in the wet area of an evaporator coil or drain pan.

Humidifier: Climates with dry air can irritate your skin and trigger allergies, as well as cause furniture and dry wall to crack. A whole-house humidifier helps maintain appropriate moisture levels within your home.

For more information about these and other Maytag products, please consult your select Maytag heating and cooling dealer.

Typical efficiency ratings*

*Annual Fuel Utilization Efficiency (AFUE) is the measure of a furnace's heating efficiency.
